DETAILED ACTION

Acknowledgement of Applicant's Amendments

1. Examiner acknowledges applicant's amendments to the specification, which were in response to first non-final Office action. These amendments overcome the objections previously presented by the examiner. In addition, examiner acknowledges applicant's amendments to the claims.

Allowable Subject Matter

2. Claims 1 and 3-10 are allowed. The examiner has renumbered these claims as claims 1-8, accordingly.

3. The following are the examiner's reasons for allowance: the prior art made of record fails to anticipate or make obvious the claimed subject matter of claims 1, and therefore, the claims which depend on claim 1. Specifically, the prior art fails to suggest, in combination with the remaining claimed elements, a finger pad comprising a pin head with a slit and a guide groove, wherein cables surround the finger pad through the guide groove. In addition, the prior art fails to suggest wherein the finger pads include a bolt tightened into a threaded hole of the pin head, which includes a tension bar, whereby the tension bar is moved close to and away from the pin head when the bolt is tightened and loosened.
